ATLAS15H

WARNING: Read the following carefully before attempting to install or service this unit! Failure to do so may result in bodily injury, property and/or fixture damage. Retain this sheet for future reference.

GENERAL DESCRIPTION:
This luminaire is designed for indoor and outdoor ceiling mounted application areas and is suitable for use in wet locations. It should not be installed in locations with limited ventilation or within enclosures with high ambient temperatures.

CAUTION:
Please be sure to follow local electrical codes. Luminaires should only be installed by a qualified electrician. Disconnect power to the circuit before wiring luminaire.

ELECTRICAL CONNECTIONS:
Luminaires are factory wired for specific voltages. Make sure the supply voltage is compatible with the luminaire. Universal voltage luminaires may be used with any voltage between 120V and 277V.
WIRING GUIDE:
HOT = Black
NEUTRAL = White
GROUND = Green or Green w/ Yellow Stripe

Mounting Instructions

1. Remove the plug on the top of the luminaire.

2. Insert wiring into the fixture through the threaded hole.

MOUNTING INSTRUCTIONS CONTINUE ON BACK

Mounting Instructions (Continued)

3. Align the ½" NPT threaded hole. Rotate the luminaire to screw onto the pipe. Make sure the luminaire is tightly fastened.To maintain the Wet Location rating, a liquid tight fitting must be used.

4. Loosen the four Phillips-head screws until the lens can be removed. The Phillips-head screws are located on the corners of the lens. Do not tamper with star-head screws.

5. Let the lens drop gently. It will be hanging by two stainless steel cables. A ½" NPT nut (not provided) can be used to further secure the luminaire.

6. Complete the electrical connections.

7. Place the lens back onto the fixture body. Secure it with the four Phillips-head screws on the four corners of the housing.

8. Apply a silicone sealer on the ceiling along the housing.
